INTRACUTANEOUS IMMUNOTHERAPY OF ACTINO-
MYCOSIS, tr. by Zaida Knowles. 10 Sep 52, 6p.
Orig. from USSR STA \$1.10 61-28101

Trans. of Sovietaya Meditsina (USSR) 1949 [v. 13]
no. 11, p. 23-24

DESCRIPTORS: Antigens, Antibodies, *Immunology,
Therapy, *Actinomyces, *Skin, *Allergy, *Fungus
infections.

The actinolyase introduced intracutaneously shows a
good therapeutic effect in the majority of forms of
actinomycosis in the presence of a clear skin-allergy
reaction in the patient. The proposed method gives not
only a good therapeutic effect, but also good cosmetic
results. (Author)

THE DIFFERENTIAL DIAGNOSIS BETWEEN MALIGNANT AND BENIGN GASTRIC ULCERS BY EMPLOYING THE PENICILLIN TEST. (1962) 8p.
Order from ODS or SLA \$1.10 62-15312

Trans. of [Sovetskaya] Meditsina (USSR) 1955 [v. 19]
no. 2, p. 36-40.

DESCRIPTORS: Diagnosis, *Peptic ulcers, *Cancer, Stomach, Tests, *Penicillins, Therapy, Gastrointestinal system, Ulcers.

Since no absolute methods of differentiating benign gastric ulcers from those having undergone malignant transformation, this problem is usually resolved by a process of prolonged dynamic study with conservative therapy which, at times, can result in the wait having been too disastrously long. DESCRIPTORS: *Surgery; Stomach; Esophagus;
Dilatation; Thorax; *Hernia; *Diaphragm.

The distant or late results in the 5 cases of trans-
thoracic esophago-gastrostomy performed for cardios-
pasm were good. There must be taken into account
the fact that a portion of the stomach has been
moved into the pleural cavity. Remembering this,
will help in preventing such diagnostic errors as
pleurisy and, if effusion does develop, complica-
tions of pleural puncture can be prevented. (Author)
